

# TRUMP'S USA RESURGENT: America Is Reindustrializing and Shovels Are in the Ground

Your Roadmap to the Industrial Surge  
Happening Right Now

In November 2025 alone, 136 new factories and 78 processing plants broke ground on American soil. Manufacturing construction starts are up 107% in October. Trade-school enrollment jumped 16%. The federal deficit has already been cut by \$390 billion this year.

You haven't seen this in your newsfeeds. Why? Because this industrial renaissance – happening right now, state by state, plant by plant – could decide the 2026 elections. This leaflet documents what they won't tell you.

## The Hidden Boom in Plain Sight

- **Federal deficit already cut \$390 billion** this year (likely \$600 billion by year-end)
- **Trade deficit plunged 24%** in August after 10% reciprocal tariff
- **S&P Global Manufacturing PMI** reported growth in 10 of the last 11 months
- **U.S. now has the strongest manufacturing growth on Earth** (China & Japan stalled)
- **Metal working machine-tool orders +17.3% YTD** – the heartbeat of real industry is roaring
- **Manufacturing construction starts +86.8% YTD** (ConstructConnect)
- **October manufacturing starts +107%** (Dodge Data & Analytics)
- **November alone:** 136 new factories, 78 processing plants, and 199 warehouses begun (Industrial SalesLeads). Shovels in the ground.

## Shovels Already in the Ground

Just a few examples of thousands of new high-paying jobs

- **Amkor** – \$7 billion U.S. semiconductor packaging campus (Arizona)
- **Merck** – now building \$3 billion pharma Center of Excellence (Virginia)
- **Hitachi Energy** – now building the largest U.S. power-transformer plants (VA & TN)
- **Foxconn/Nvidia/Apple** – AI & humanoid-robot factories (Houston & Lordstown, OH) under construction
- **Toyota** – \$14 billion battery mega-plant opens (North Carolina, 5,100 jobs)
- **Hanwha** – \$5 billion revival of Philly shipyard (first U.S. LNG carriers in 40 years) with new hires and apprenticeships underway

**From the President's New National Security Strategy (Nov 2025)**

*"Cultivating American industrial strength must become the highest priority of national economic policy."*

# THE WORKFORCE & ENERGY REVOLUTION THEY DON'T WANT YOU TO SEE

**Prom.ac**  
1-800-929-7566

## SKILLED WORKFORCE BEING REBUILT NOW

- **Registered apprenticeships** → **800,000+** (target: 1 million new per year)
- **Two-year vocational program sign-ups +11%**, Spring 2025. (5X faster than bachelor's program enrollments) GenZ voted for Trump and wants real jobs.
- **\$86 million in federal grants** already awarded to 14 states for employer-sponsored advanced manufacturing apprenticeships — with more coming
- **Small Business Administration:** 603,000 small-business manufacturers (5 million jobs) fueled by \$45 billion in SBA loans to 85,000 small firms

## POWER GRID & NUCLEAR COMEBACK

- **Twin AP1000s at VC Sumner plant** in South Carolina
- **Fermi Energy "Project Matador"** in Amarillo
- **Massive new transformer plants** breaking ground (shortage ending)
- **Utah "Operation Gigawatt":** SMR training center + factory complex in Brigham City
- **Holtec restarting Palisades (MI)** + \$200 million DOE grant for SMR fleet
- **NextEra restart** of Iowa Duane Arnold plant underway
- **TVA and Oak Ridge National Labs** are site of current builds of small modular reactors (SMRs)

The forge is lit. Walk onto any of hundreds of construction sites across America and you'll see it: factories rising from the ground, workers learning advanced skills in new apprenticeship programs, and power plants coming back online to fuel the next generation of industry. This is not theory or campaign talk — **it is happening right now, plant by plant, state by state.**

Your neighbor has never heard any of this. Ask him: "Did you know 136 new factories broke ground last month?" He won't believe you—until you show him this leaflet.

That's why the story stays buried. An industrial renaissance, already underway, rewrites the political map. But only if voters know it's happening. Share this. Post it. Hand it out. The 2026 elections will be decided by who controls the narrative—and the facts are on our side.
