Digital Equity Analytics

Why Digital Equity Analytics?

- Digital Equity requirements are embedded in many initiatives:
 - BEAD stands for Broadband *Equity* Access and Deployment Program
 - BEAD requires each eligible entity to develop a 5-Year Action Plan and a Digital Equity Plan.
- The Digital Equity Act funds three programs:
 - Digital Equity Planning Grant (\$60 million)
 - Digital Equity Capacity Grant Program (\$1.44 billion)
 - Digital Equity Competitive Grant Program (\$1.25 billion)
- The FCC is establishing digital discrimination rules.
- Affordability
 - Low-Cost Plans
 - Possible Future ACP

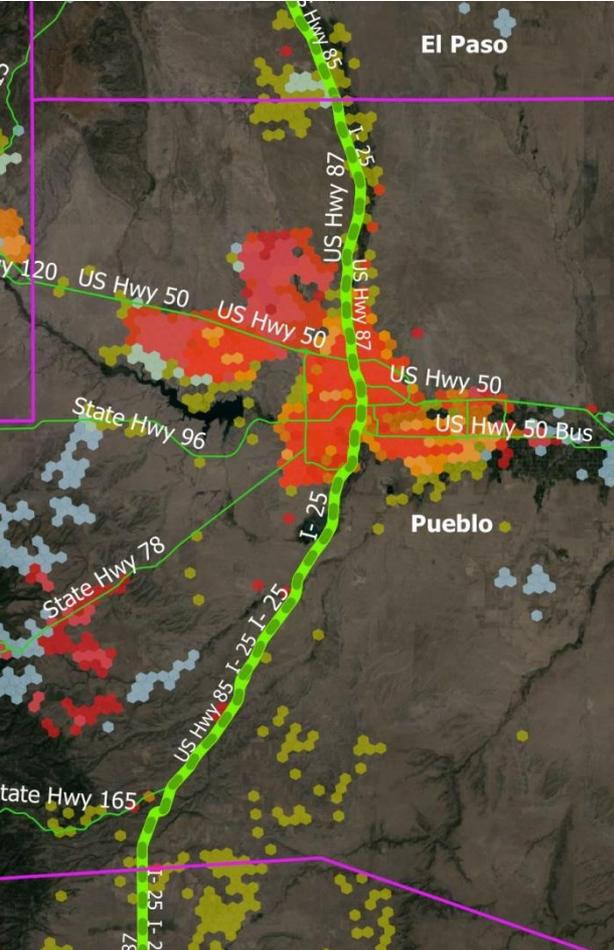

Sources of "Truth"

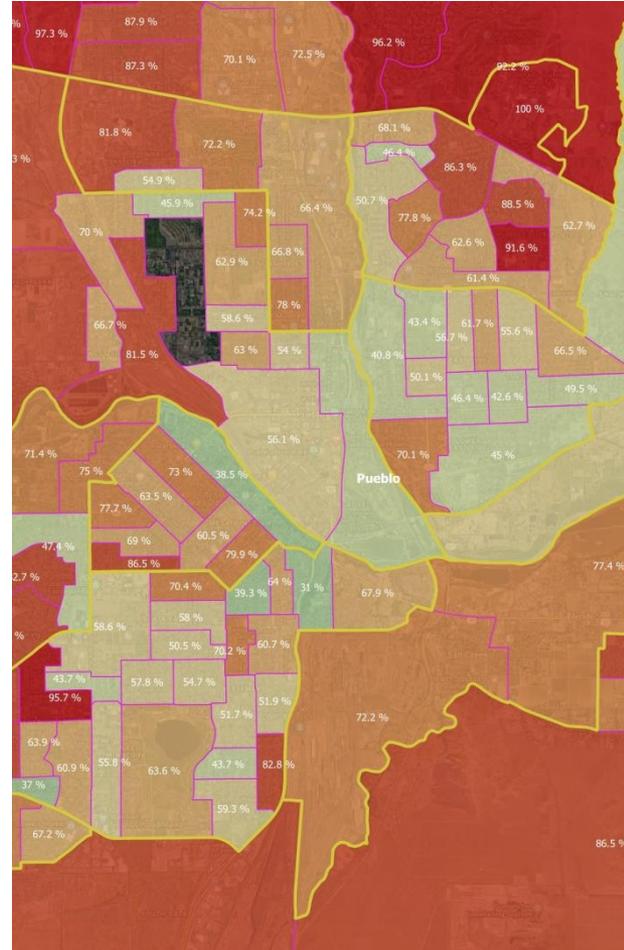

Broadband advocates can draw upon several overlapping data sources – each with strengths and weaknesses – to understand what is happening “on the ground”

ISP-Reported | Survey-Based | Crowd Sourced

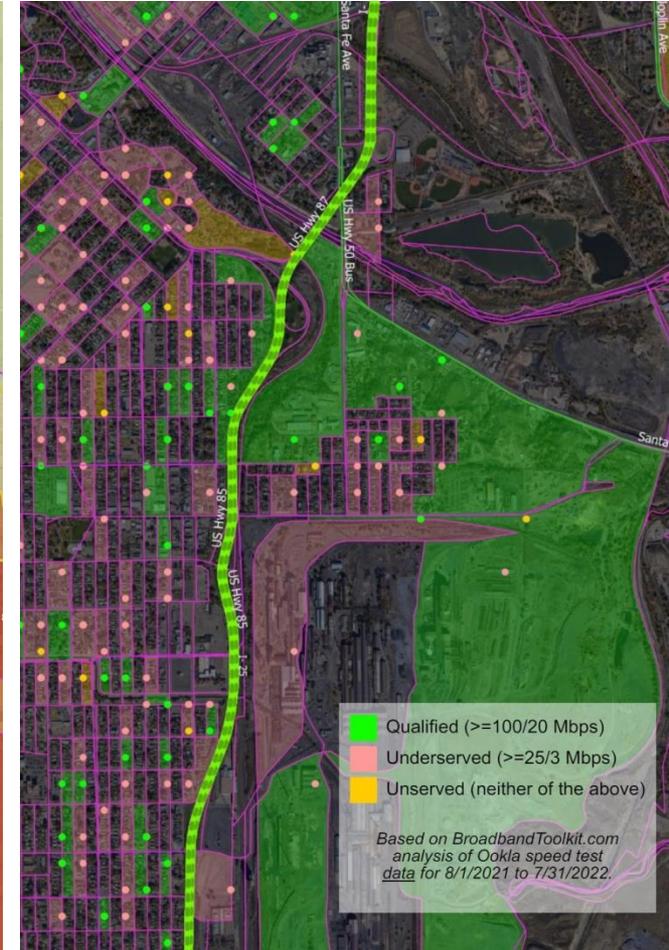

ISP-Reported
Layers of Technology

Survey-Based
Device Ownership

Crowd-Sourced (whitepaper)
Measured Performance

American Community Survey (ACS)

- The US Census Bureau's American Community Survey is comprehensive and expansive:
 - 48 pages long
 - Sample size: 3.5 million households x 5 years = 17.5 million surveys mailed (response required by law; response rate: ~ 50%)
 - Covers: household demographics, income, key categories of household expenditure, housing attributes, participation in government programs, education, disability status, veteran status, telephone and broadband connectivity, and other topics.
 - Tabulated in 1-year (very current, but not as granular) and 5-year (most granular) formats.

Levels of Aggregation		Number of tables (think "cross-tabs")		Parameters per table		Potential Number of Data Sets
(14 in 1-Year, 18 in 5-Year, plus specialty calculations, less suppressed calculations)	X	(1,577 in 1-Year plus 1,277 in 5-Year = 2,854)	X	Assume 10 – varies widely by subject.	=	Ignores overlaps between data tables and permutations of tables and levels of aggregation that are suppressed, for various reasons.
16		2,854		10		456,640

Analogy: the ACS is like the Library of Congress. It takes skill to navigate it.

Digital Equity Act: Covered Population (Simple Metric)

**Low-Income Households
(150% of Poverty)**

Aging Populations

Incarcerated Individuals

Veterans

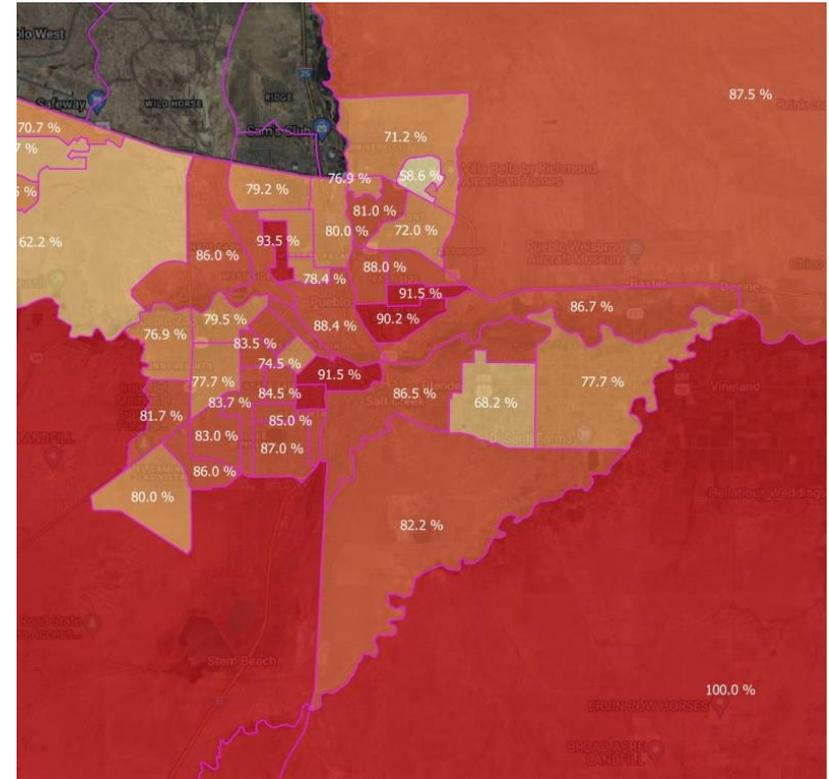

People with Disabilities

People with Language Barriers

Racial and Ethnic Minorities

Rural Inhabitants

Result: Covered Population

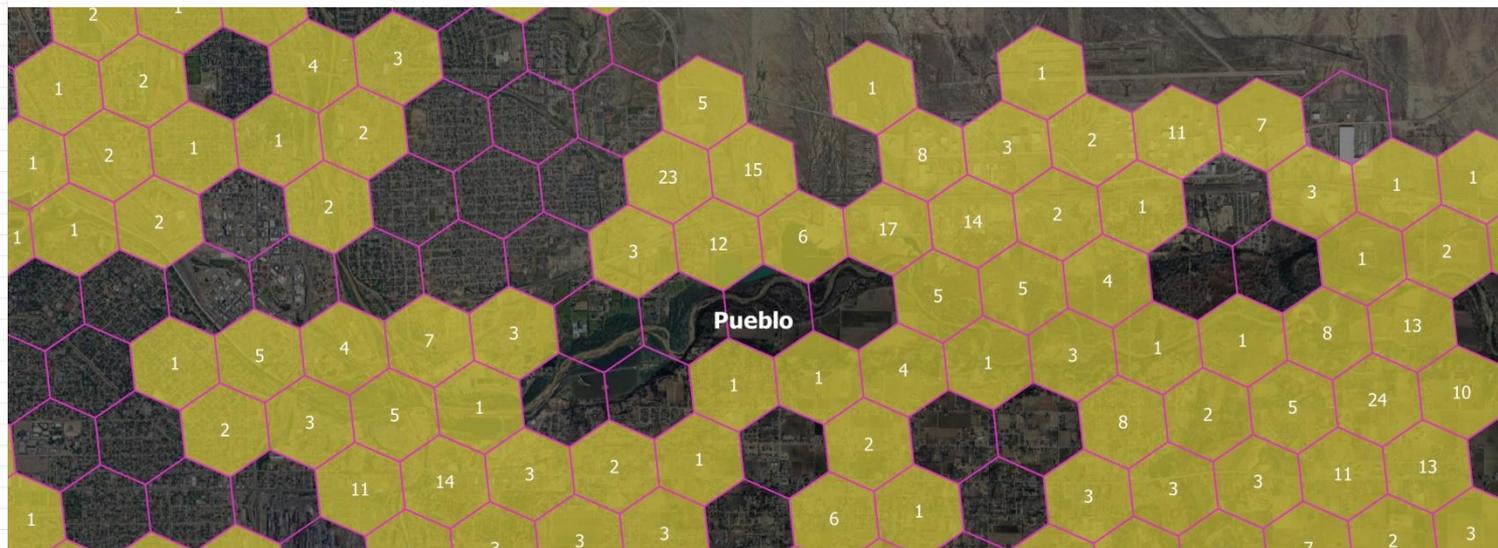

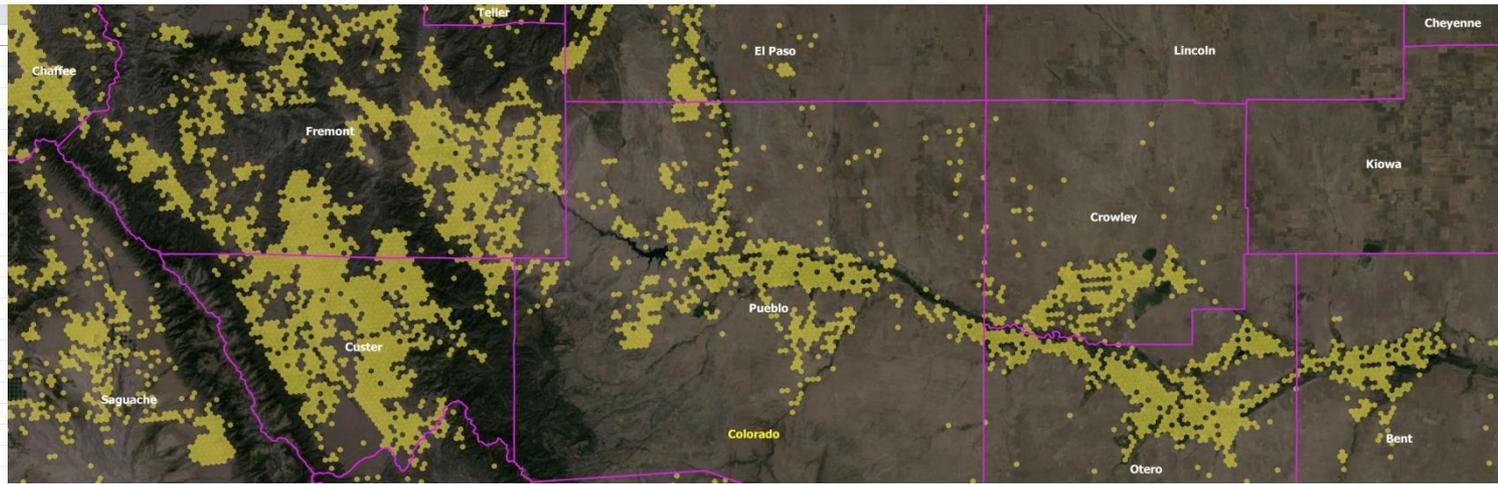

Unserved and Underserved Locations

NTIA Indicators of Need

- A data set and an associated online map ([link](#)), created in 2021, providing demographic and crowd-sourced data at the tract and county level. See the PDF guide ([link](#)). The map also included program-specific data.
- *Tract data*: population, number of households, households with no internet enabled devices, households with no internet, poverty rates, maximum advertised internet download speeds based on FCC form 477, median download speeds based on Ookla data, and median upload speeds based on Ookla data.
- *County data*: population, number of households, households with no internet enabled devices, households with no internet, poverty rates, maximum advertised internet download speeds based on FCC form 477, median download speeds based on Ookla data, and median upload speeds based on Ookla data, median download speeds based on M-Lab data, median upload speeds based on M-Lab data, and broadband usage percentage based on Microsoft data.

Many would love to see the *Indicators of Need* updated on a regular basis.

Correlation, Causality, and Metrics

**Housing attributes
(type, density, owned
vs rented)**

**Income and
Family Structure**

Age

**Race and
Ethnicity, Places
of Origin**

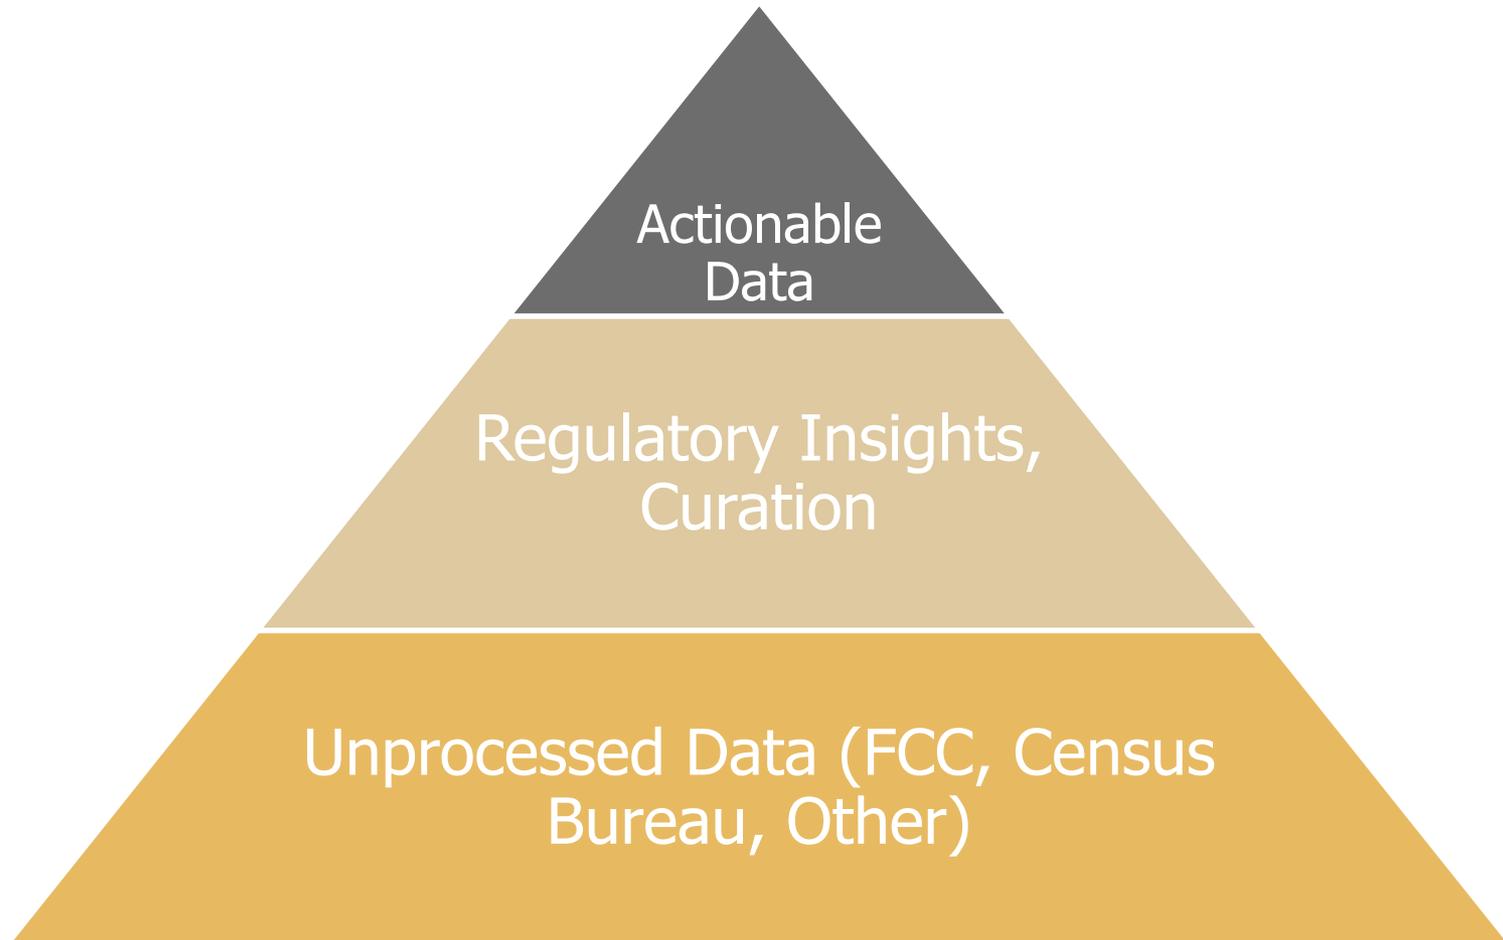

**Language
and
Literacy**

Rurality

**Devices and
Connectivity**

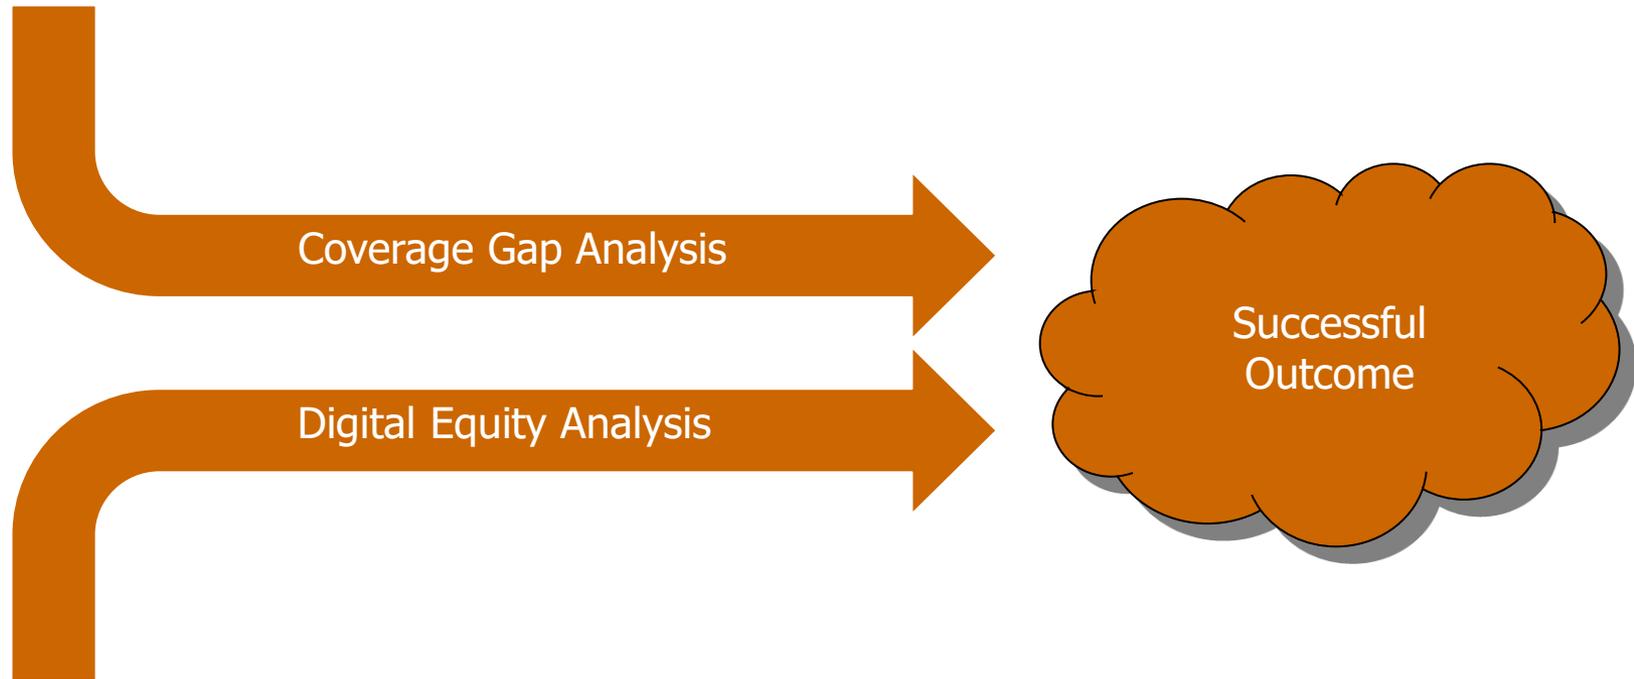

**Social
Vulnerability
Index (SVI)**

What is actionable data?

Downloadable CSV files are necessary but not sufficient to deliver actionable data

Coverage Analysis + Digital Equity Analysis

A successful outcome involves the alignment of very different types of goals and the associated data.

BEAD | Who and Where: Subgrantee Selection

Left Brain

- Must comply with detailed BEAD NOFO requirements
- Unserved, underserved, uplink and downlink speeds, latency, reliable technologies, high cost threshold, avoiding areas with enforceable commitments

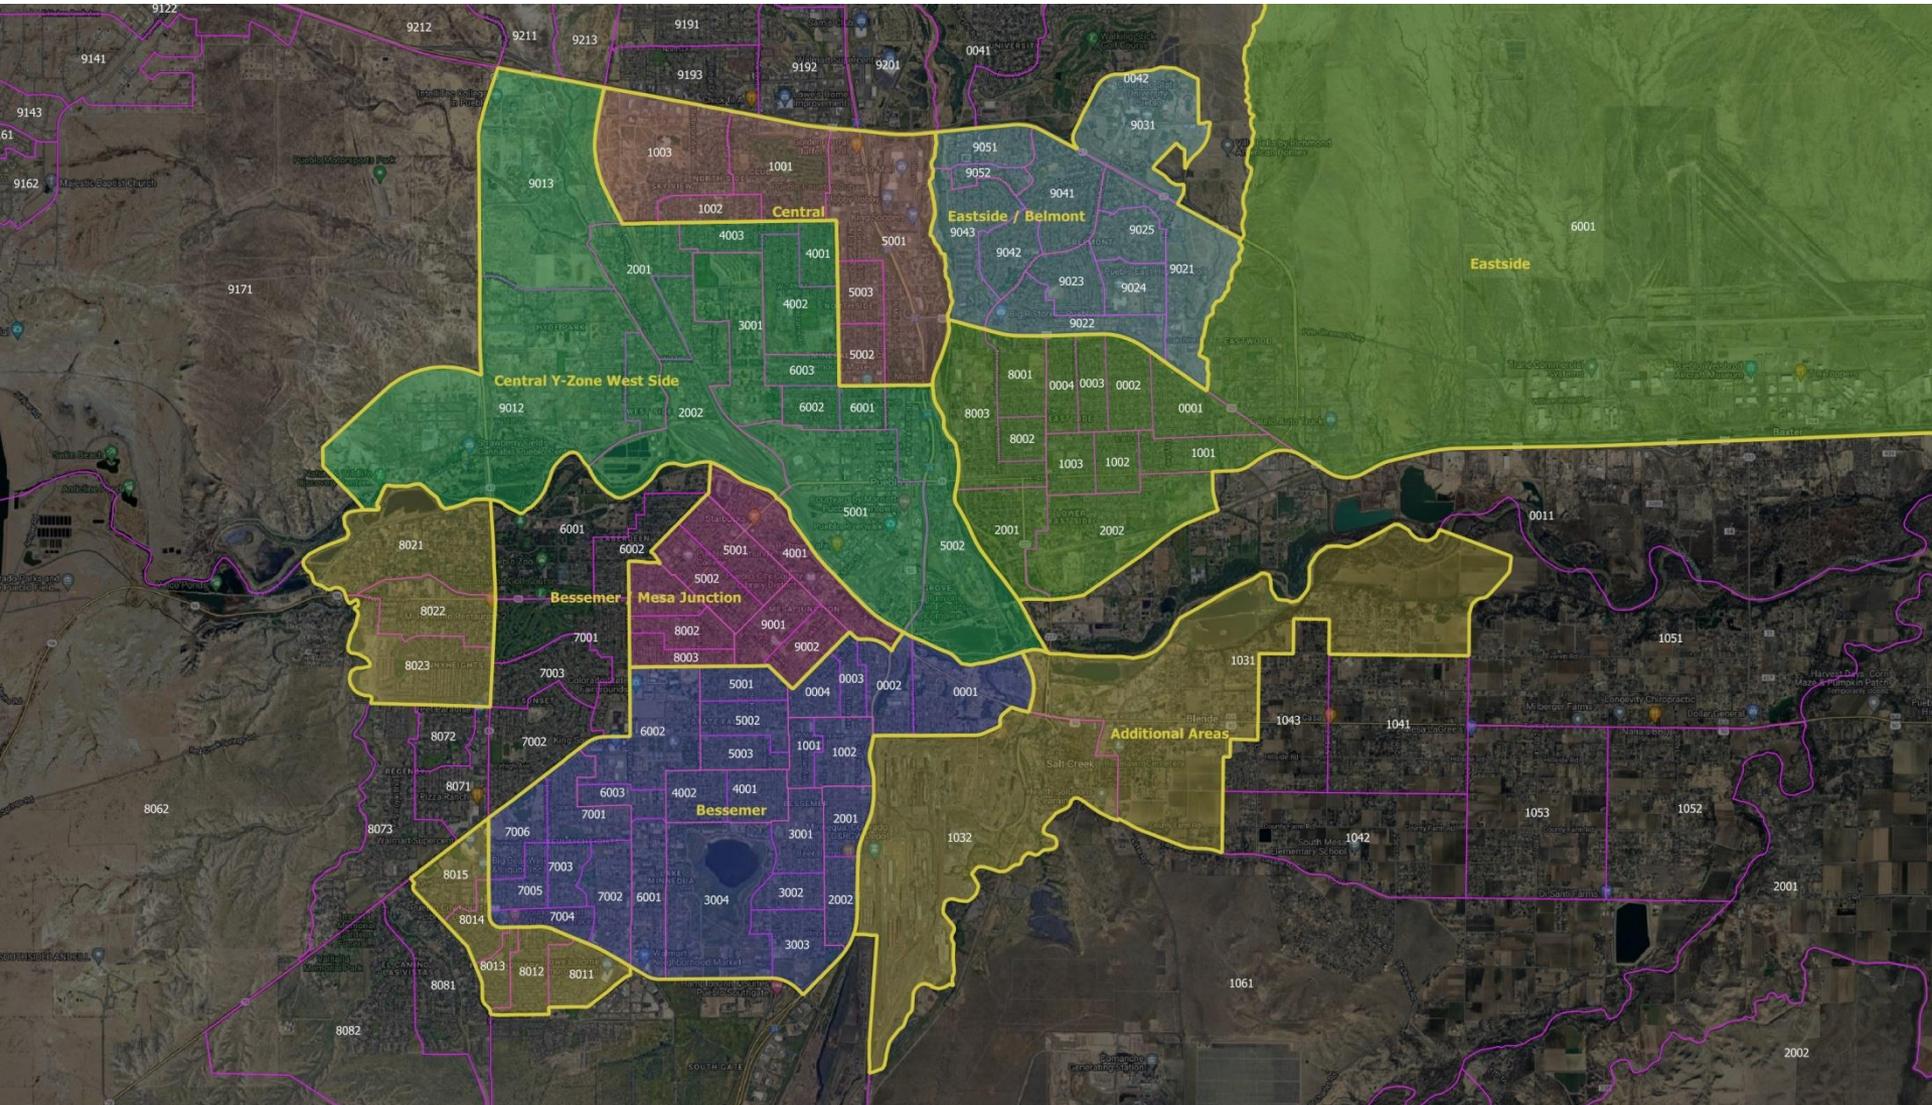

Right Brain

- A transformative solution for those in need
- Reflects many qualitative dimensions
- Tells a story
- Ideally, visualizes the story with data

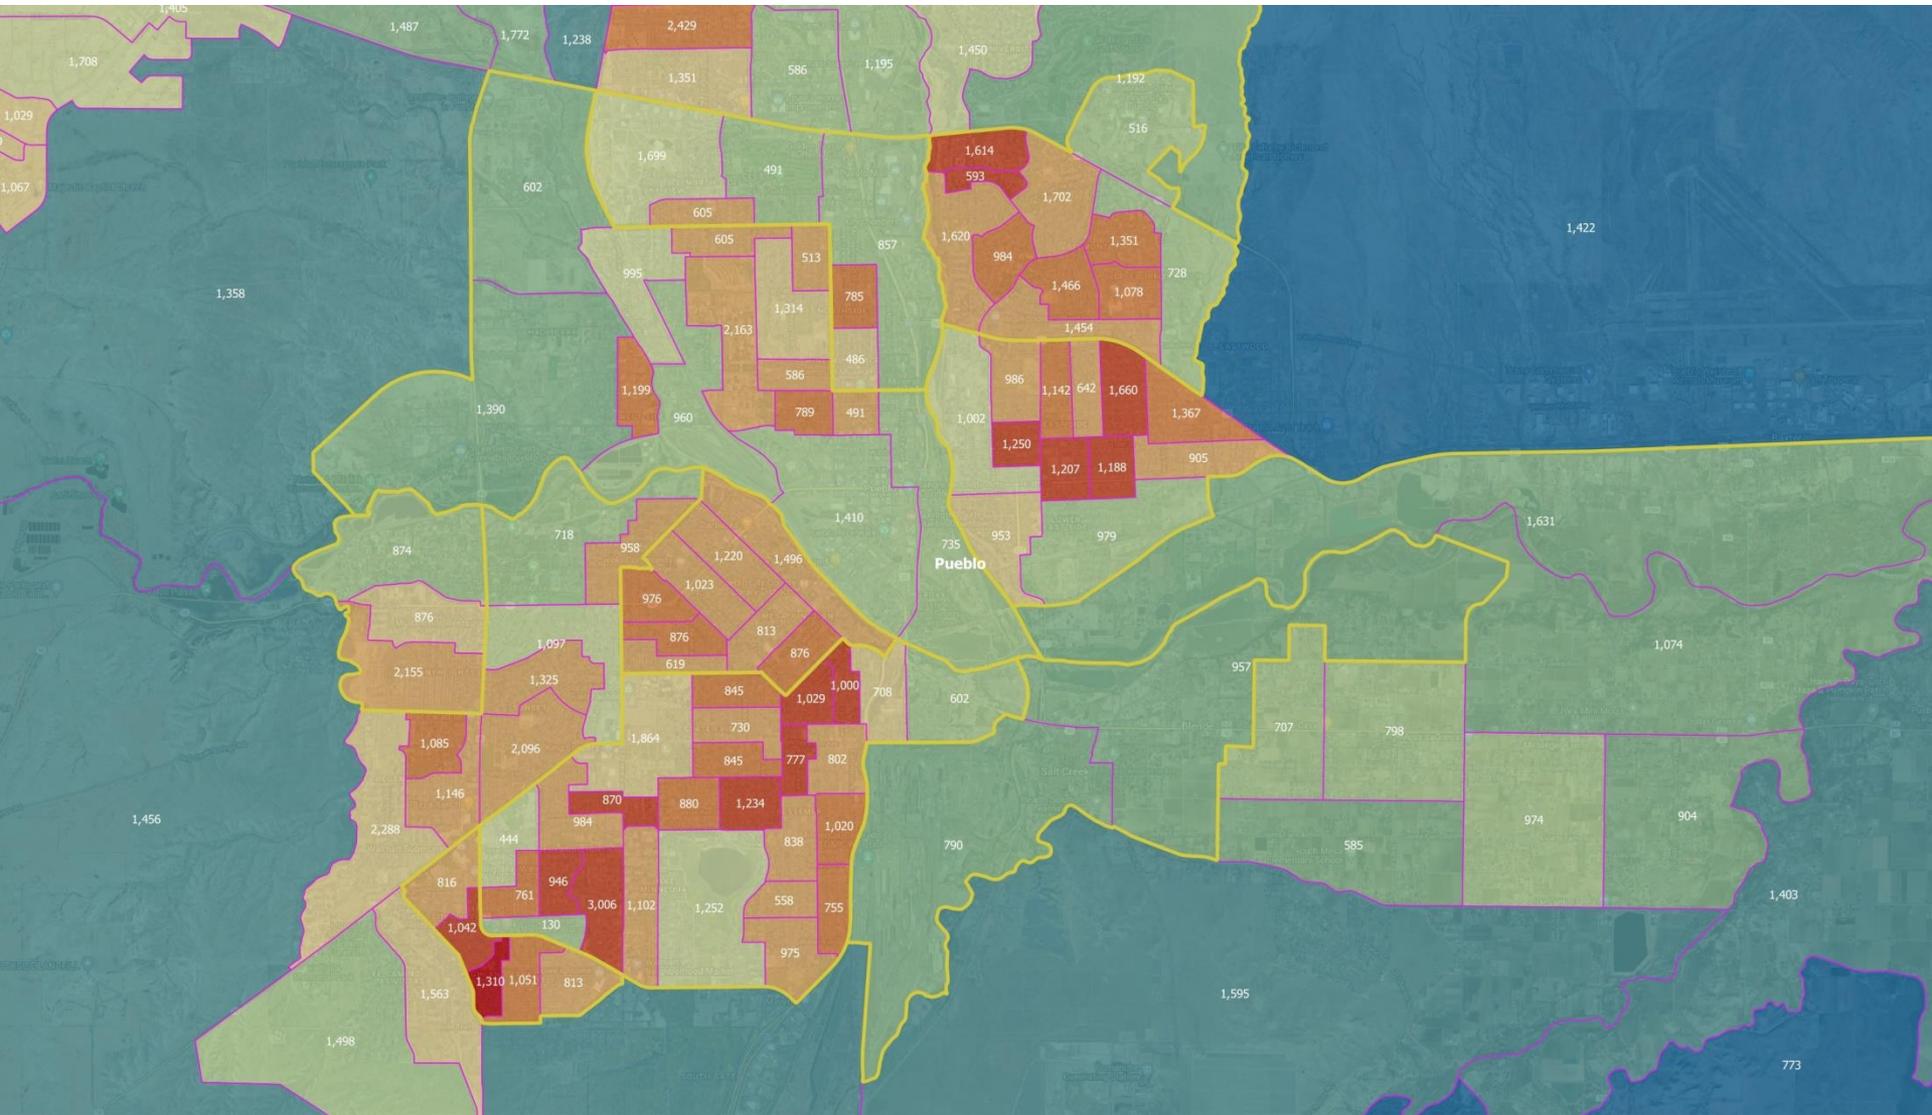

State broadband officials, grant applicants, and others must engage both sides of the brain

Visualizing the Story: Pueblo, CO

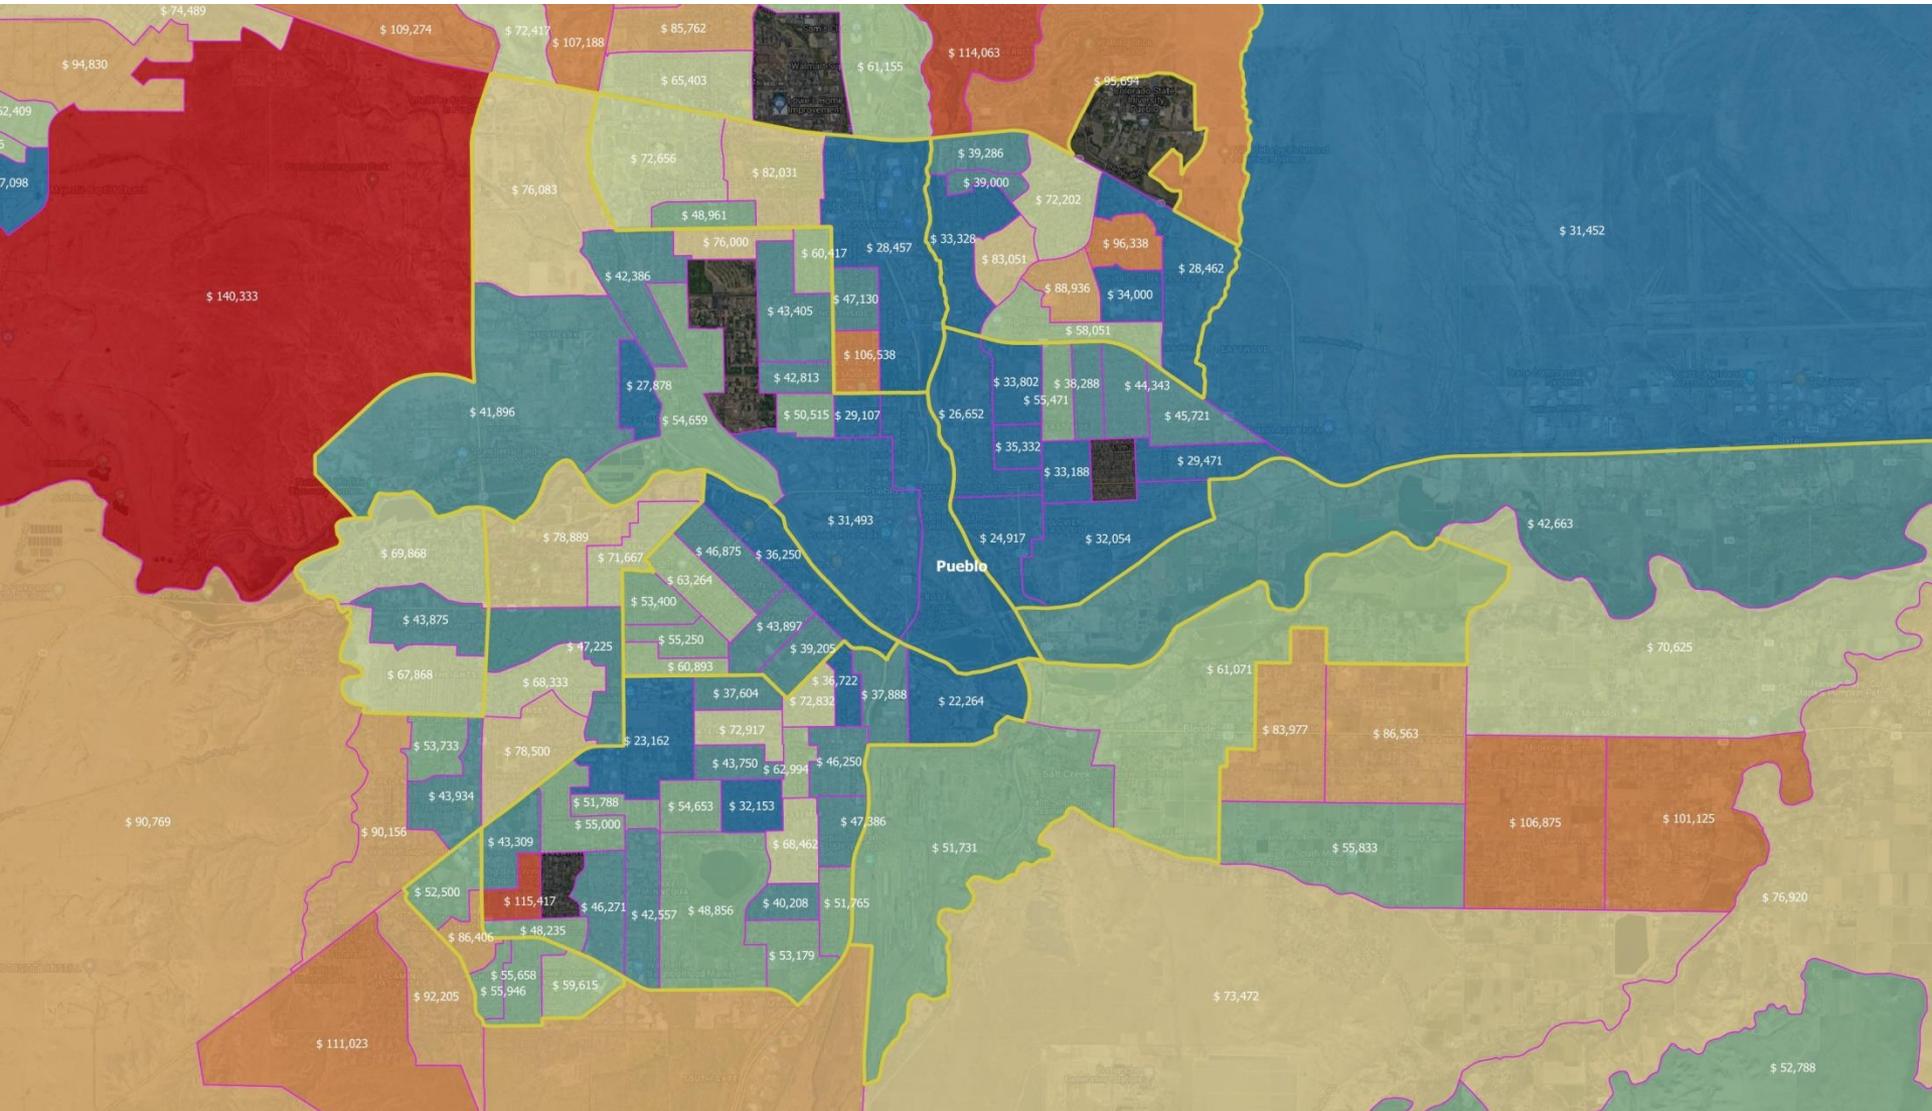

Community of Pueblo, CO | Adelante Connect

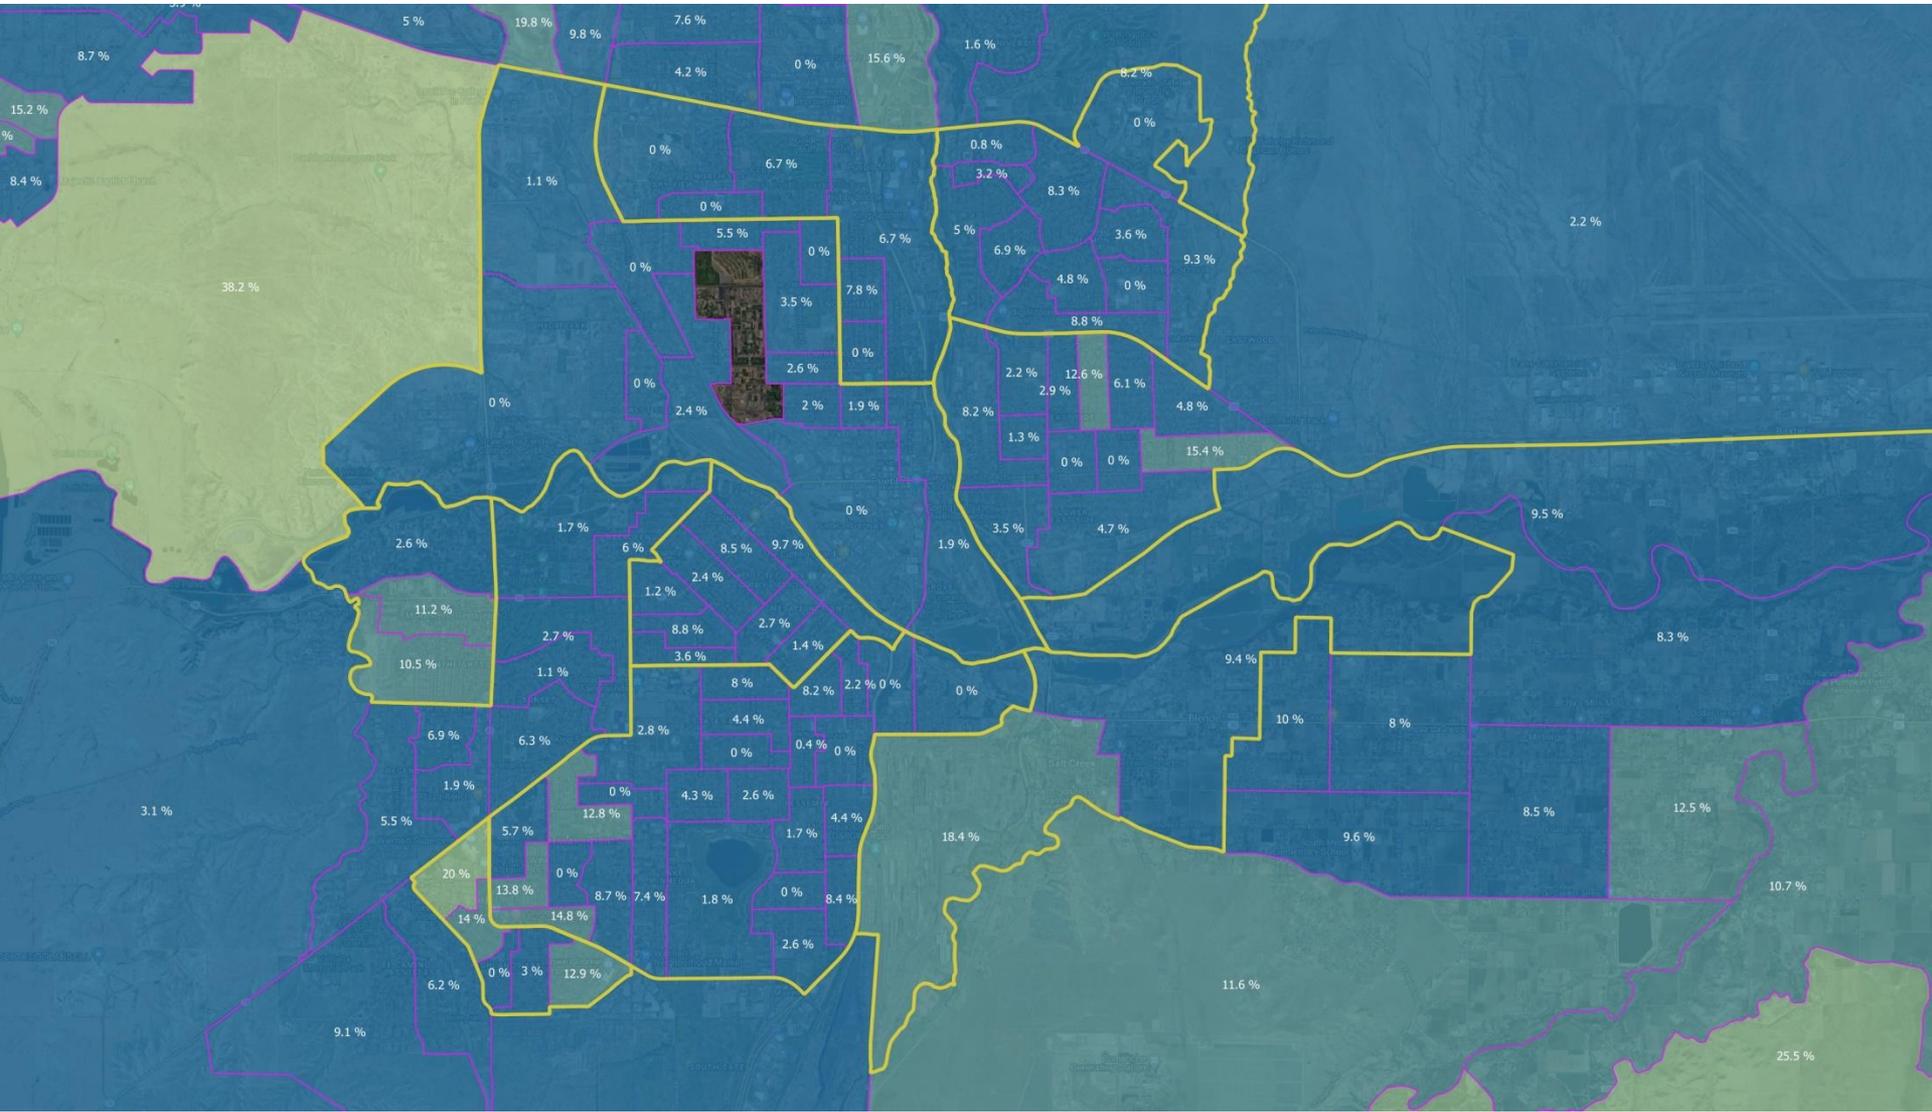

Population (color = density, number = population, bgroup)

View from the Trenches: an Award Recipient

Community of Pueblo, CO | Adelante Connect

- A urban / rural county in Colorado:
 - Home to Colorado State University, Pueblo
 - Facing digital divide challenges reflective of many rural communities
 - A majority minority community
 - Predominantly Hispanic
 - Largely low income, at least in the urban core
 - No significant broadband initiatives in the past 20 years
- The following pages describe the community using demographic / digital equity data, available on a tract or block group (when available) level.

Implications of Showcasing the Available Data (2021 to 2024)

- An NTIA Connecting Minority Communities Pilot Program grant recipient
 - The grant is designed to serve the community, not just the university
 - Six distinct neighborhoods plus some outlying geographic areas
- Recent Developments: Federal Funding
 - Small NTIA middle mile grant
 - Capital Projects Fund grant in Avondale
 - FCC ACP Pilot Grant
- Recent Developments: Equity Investments
 - Comcast: major upgrade (\$70 million)
 - Intrepid / T-Mobile: fiber funding (\$80 million)

Pueblo Opportunity Project: "Alliance"

Pueblo Opportunity Project - Digital Navigation System

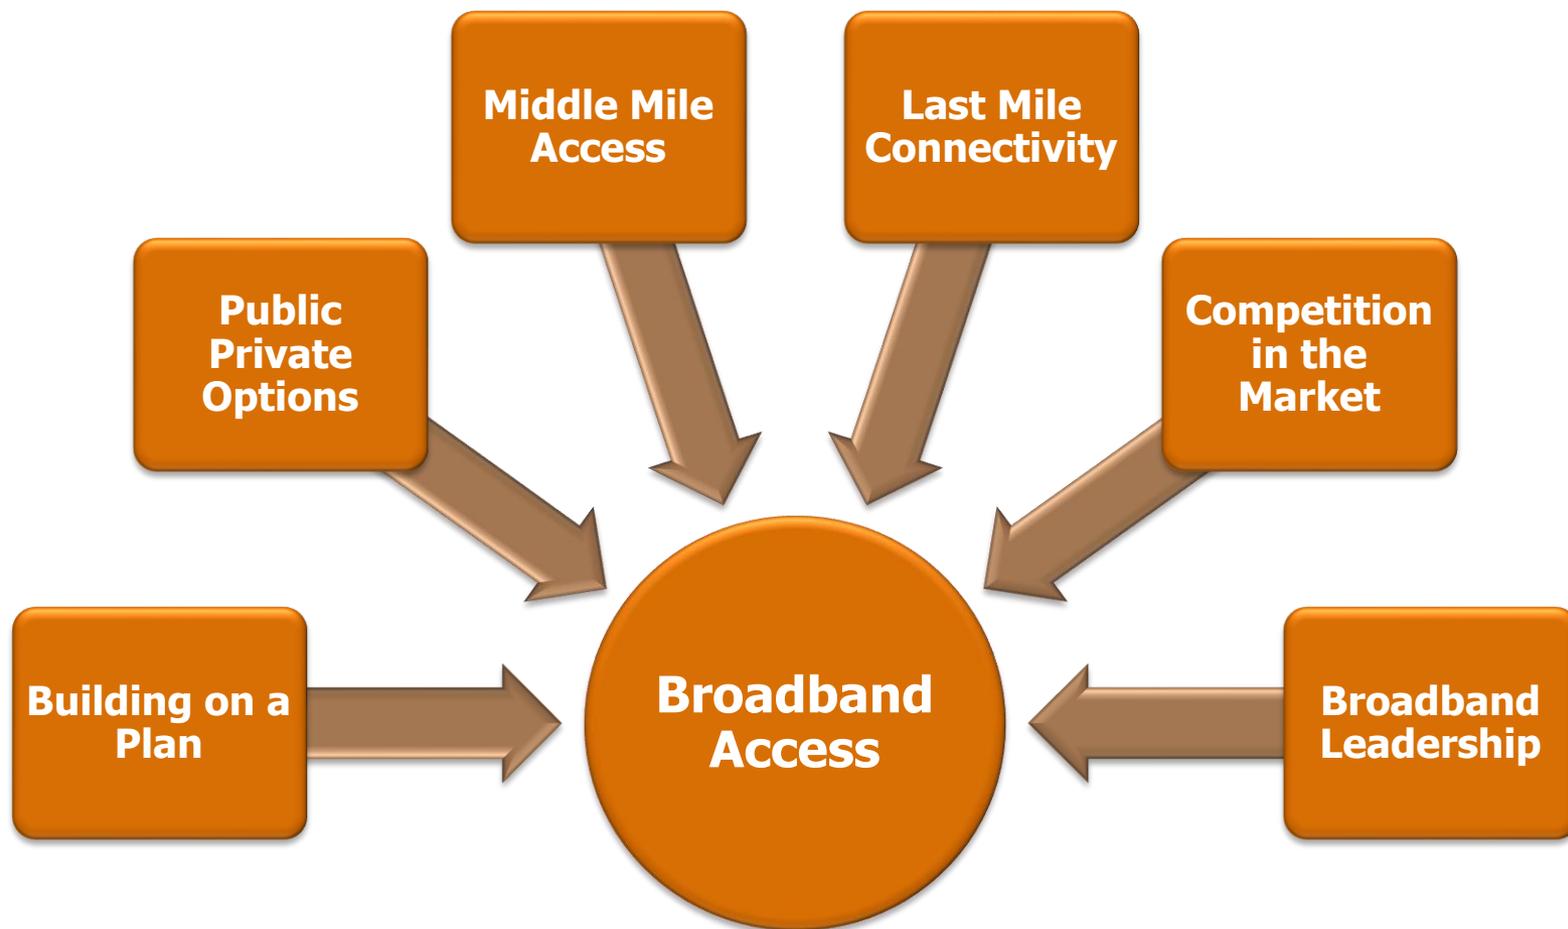

Measuring Outcomes

**Key
Stakeholder
Vision
Sessions**

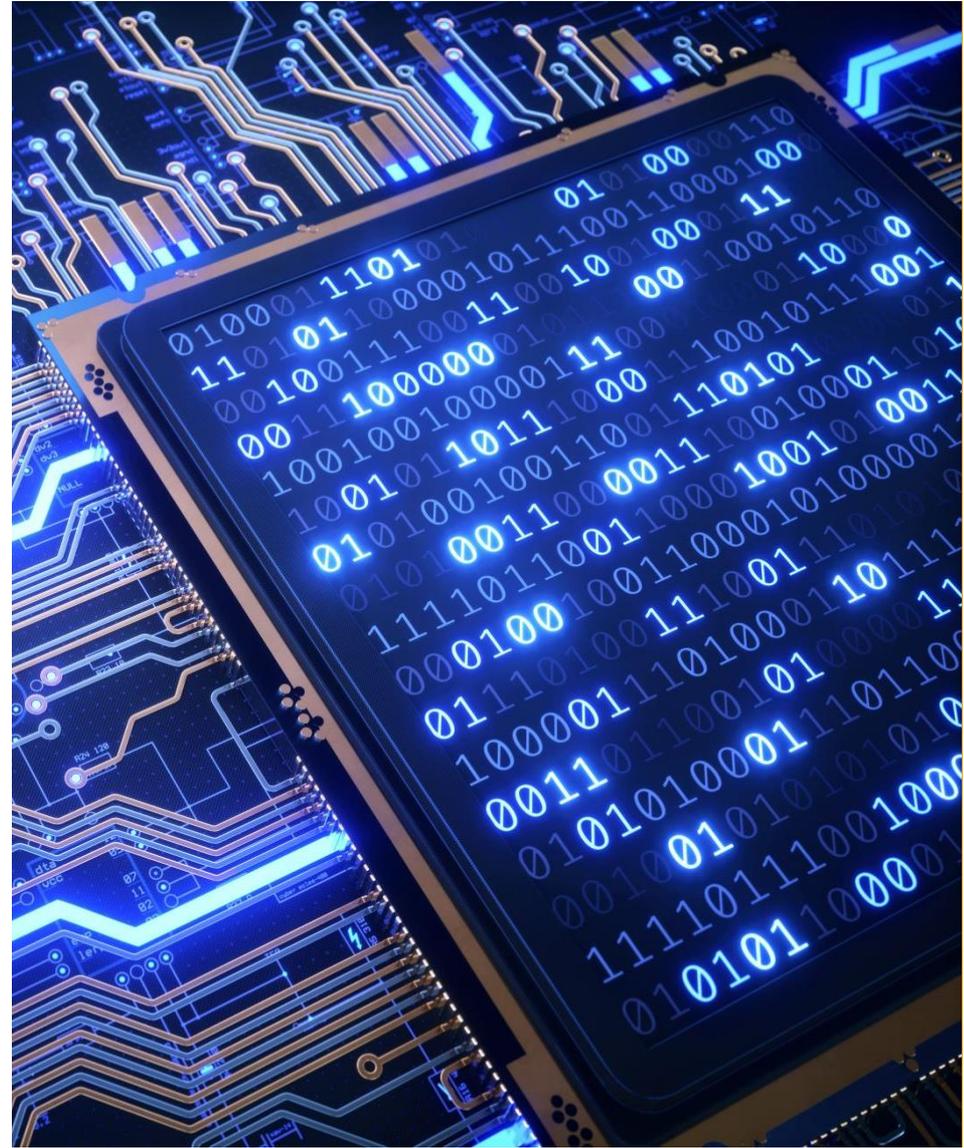

**Focus
Groups**

Pueblo Opportunity Project (POP) - Broadband Access

Adelante Connect

- Targeted Digital Literacy / 50 Learning Modules
- 7 Digital Navigator Positions
- Student Households and Services:
 - Devices for 200 Students / Households
 - Broadband Access, up to 1Gbps symmetrical, for the duration of the program
- 4 Community Anchor Institution Partners

View from the State

Workforce Development - Colorado

- BEAD-funded project will create more than 3k jobs in Colorado
- CBO & CDLE-OFW created a Broadband Workforce Plan:
 - Awareness
 - Outreach and Education
 - Trainings available
- Main Strategies
 - Awareness: Raise awareness of telecommunications and broadband pathways.
 - Training: Pilot, evaluate, and scale training and job placement programs.
 - Employment: Embed telecom into workforce infrastructure.
