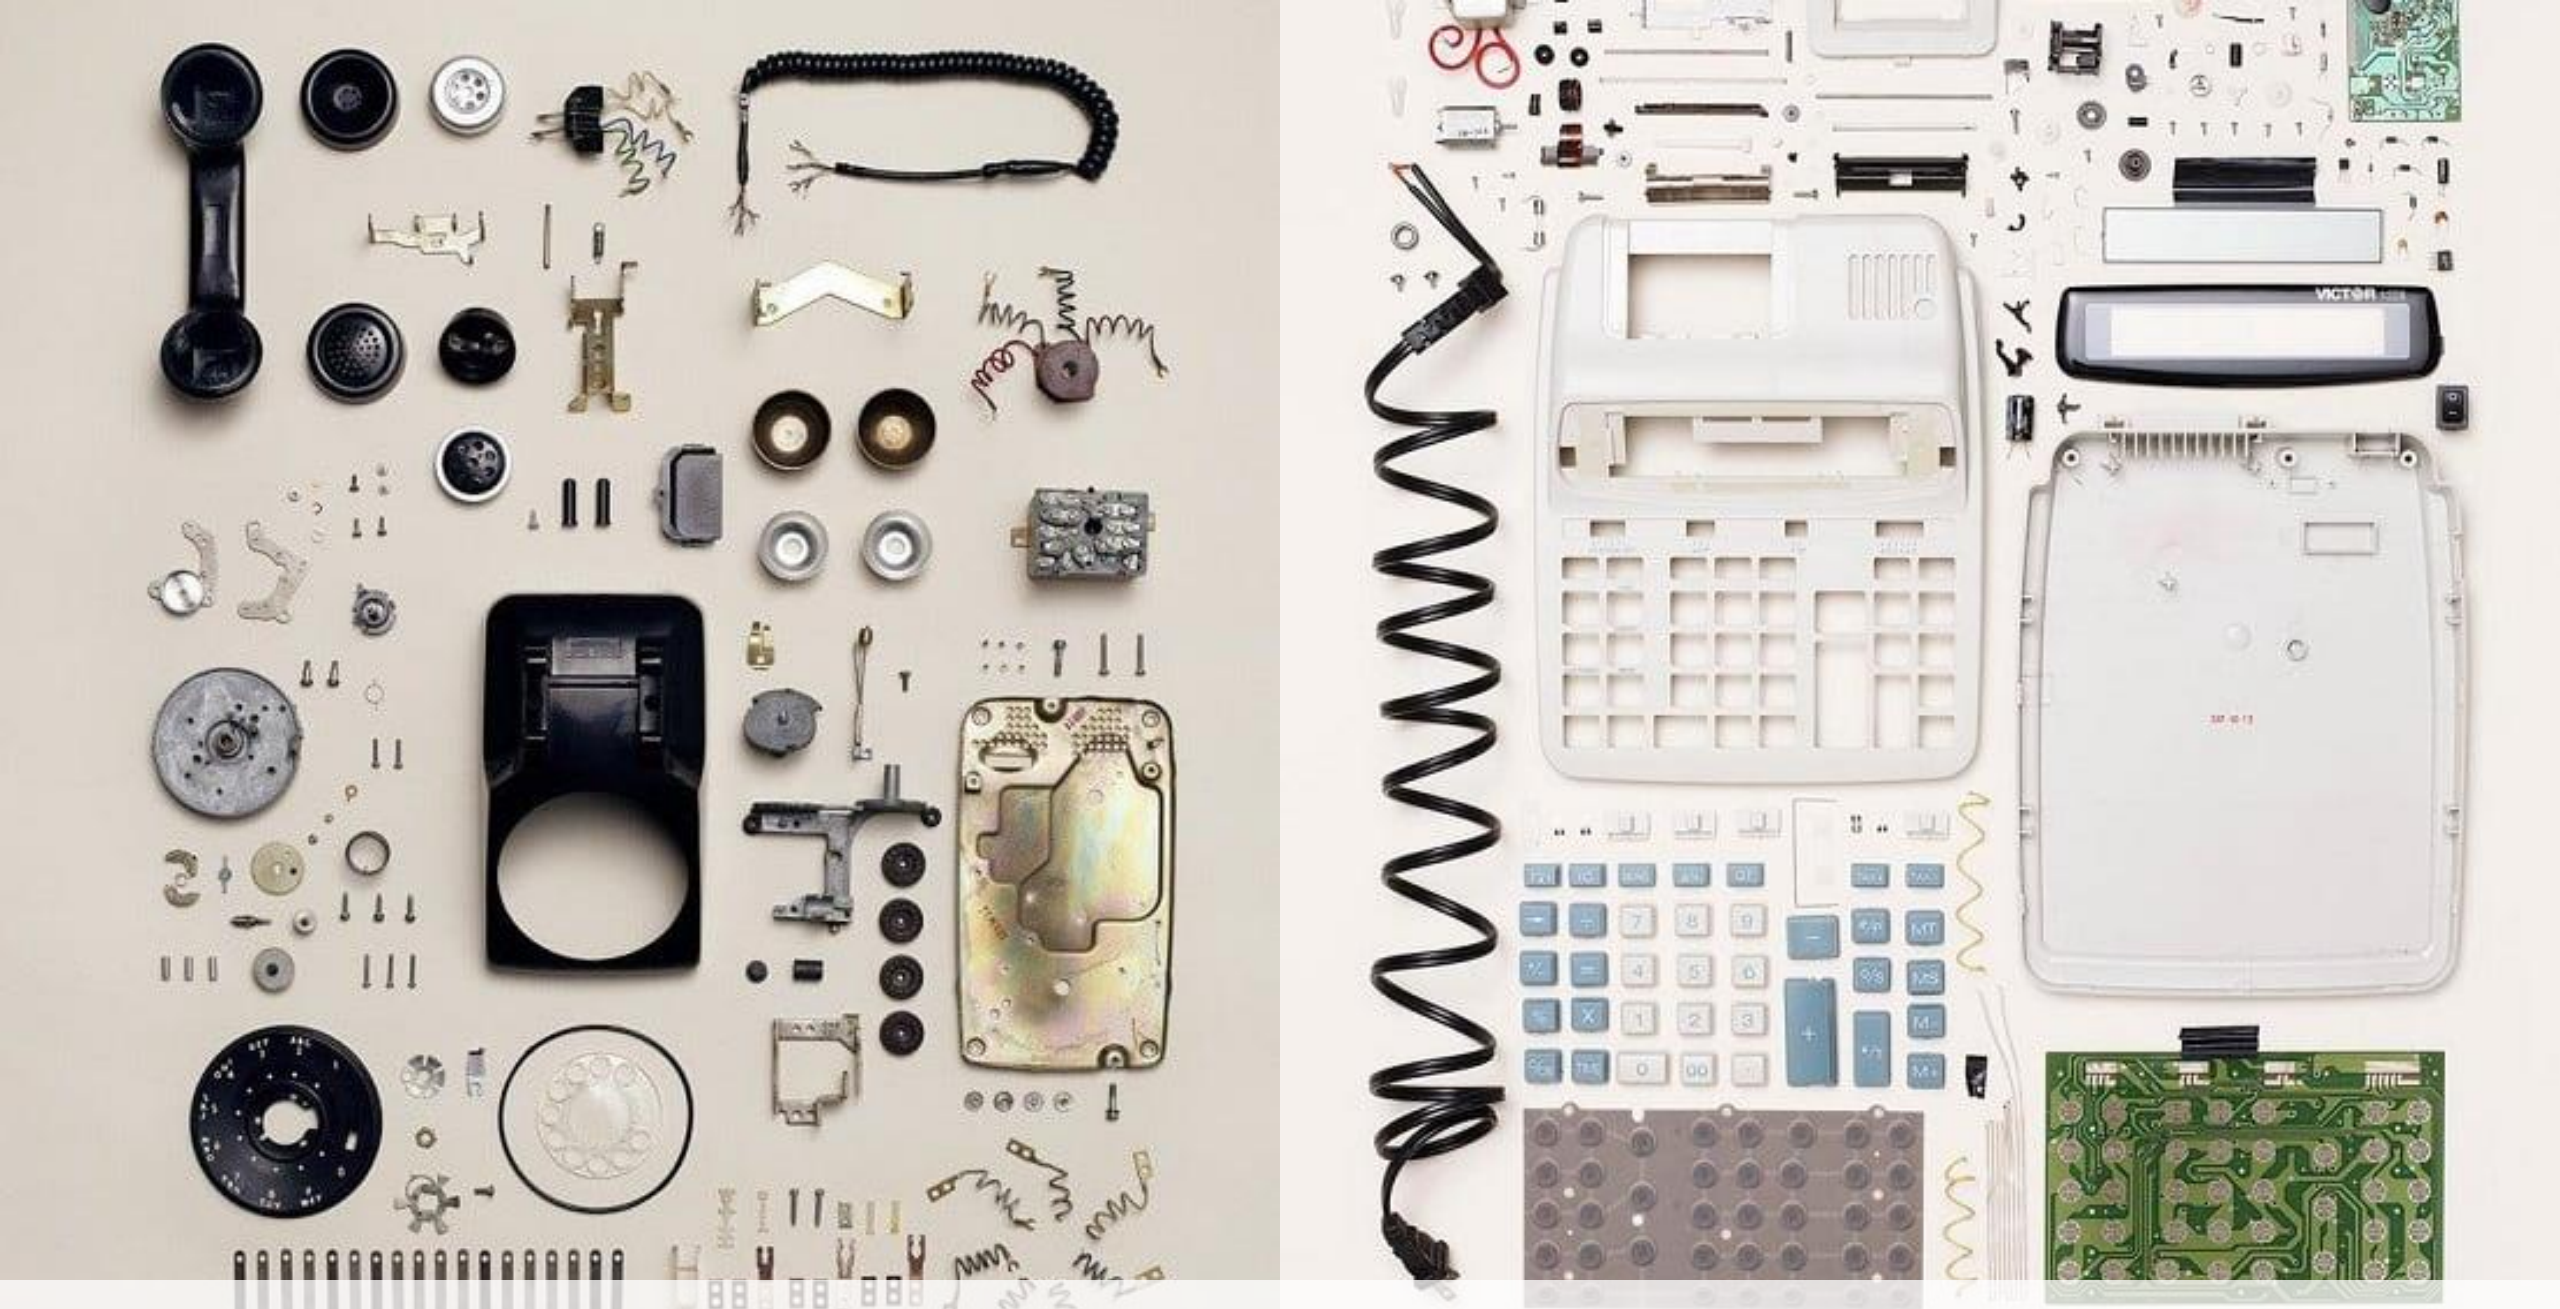
My story isn't a straight line. It’s more like a tangled plate of spaghetti.

My story started with two simple words.



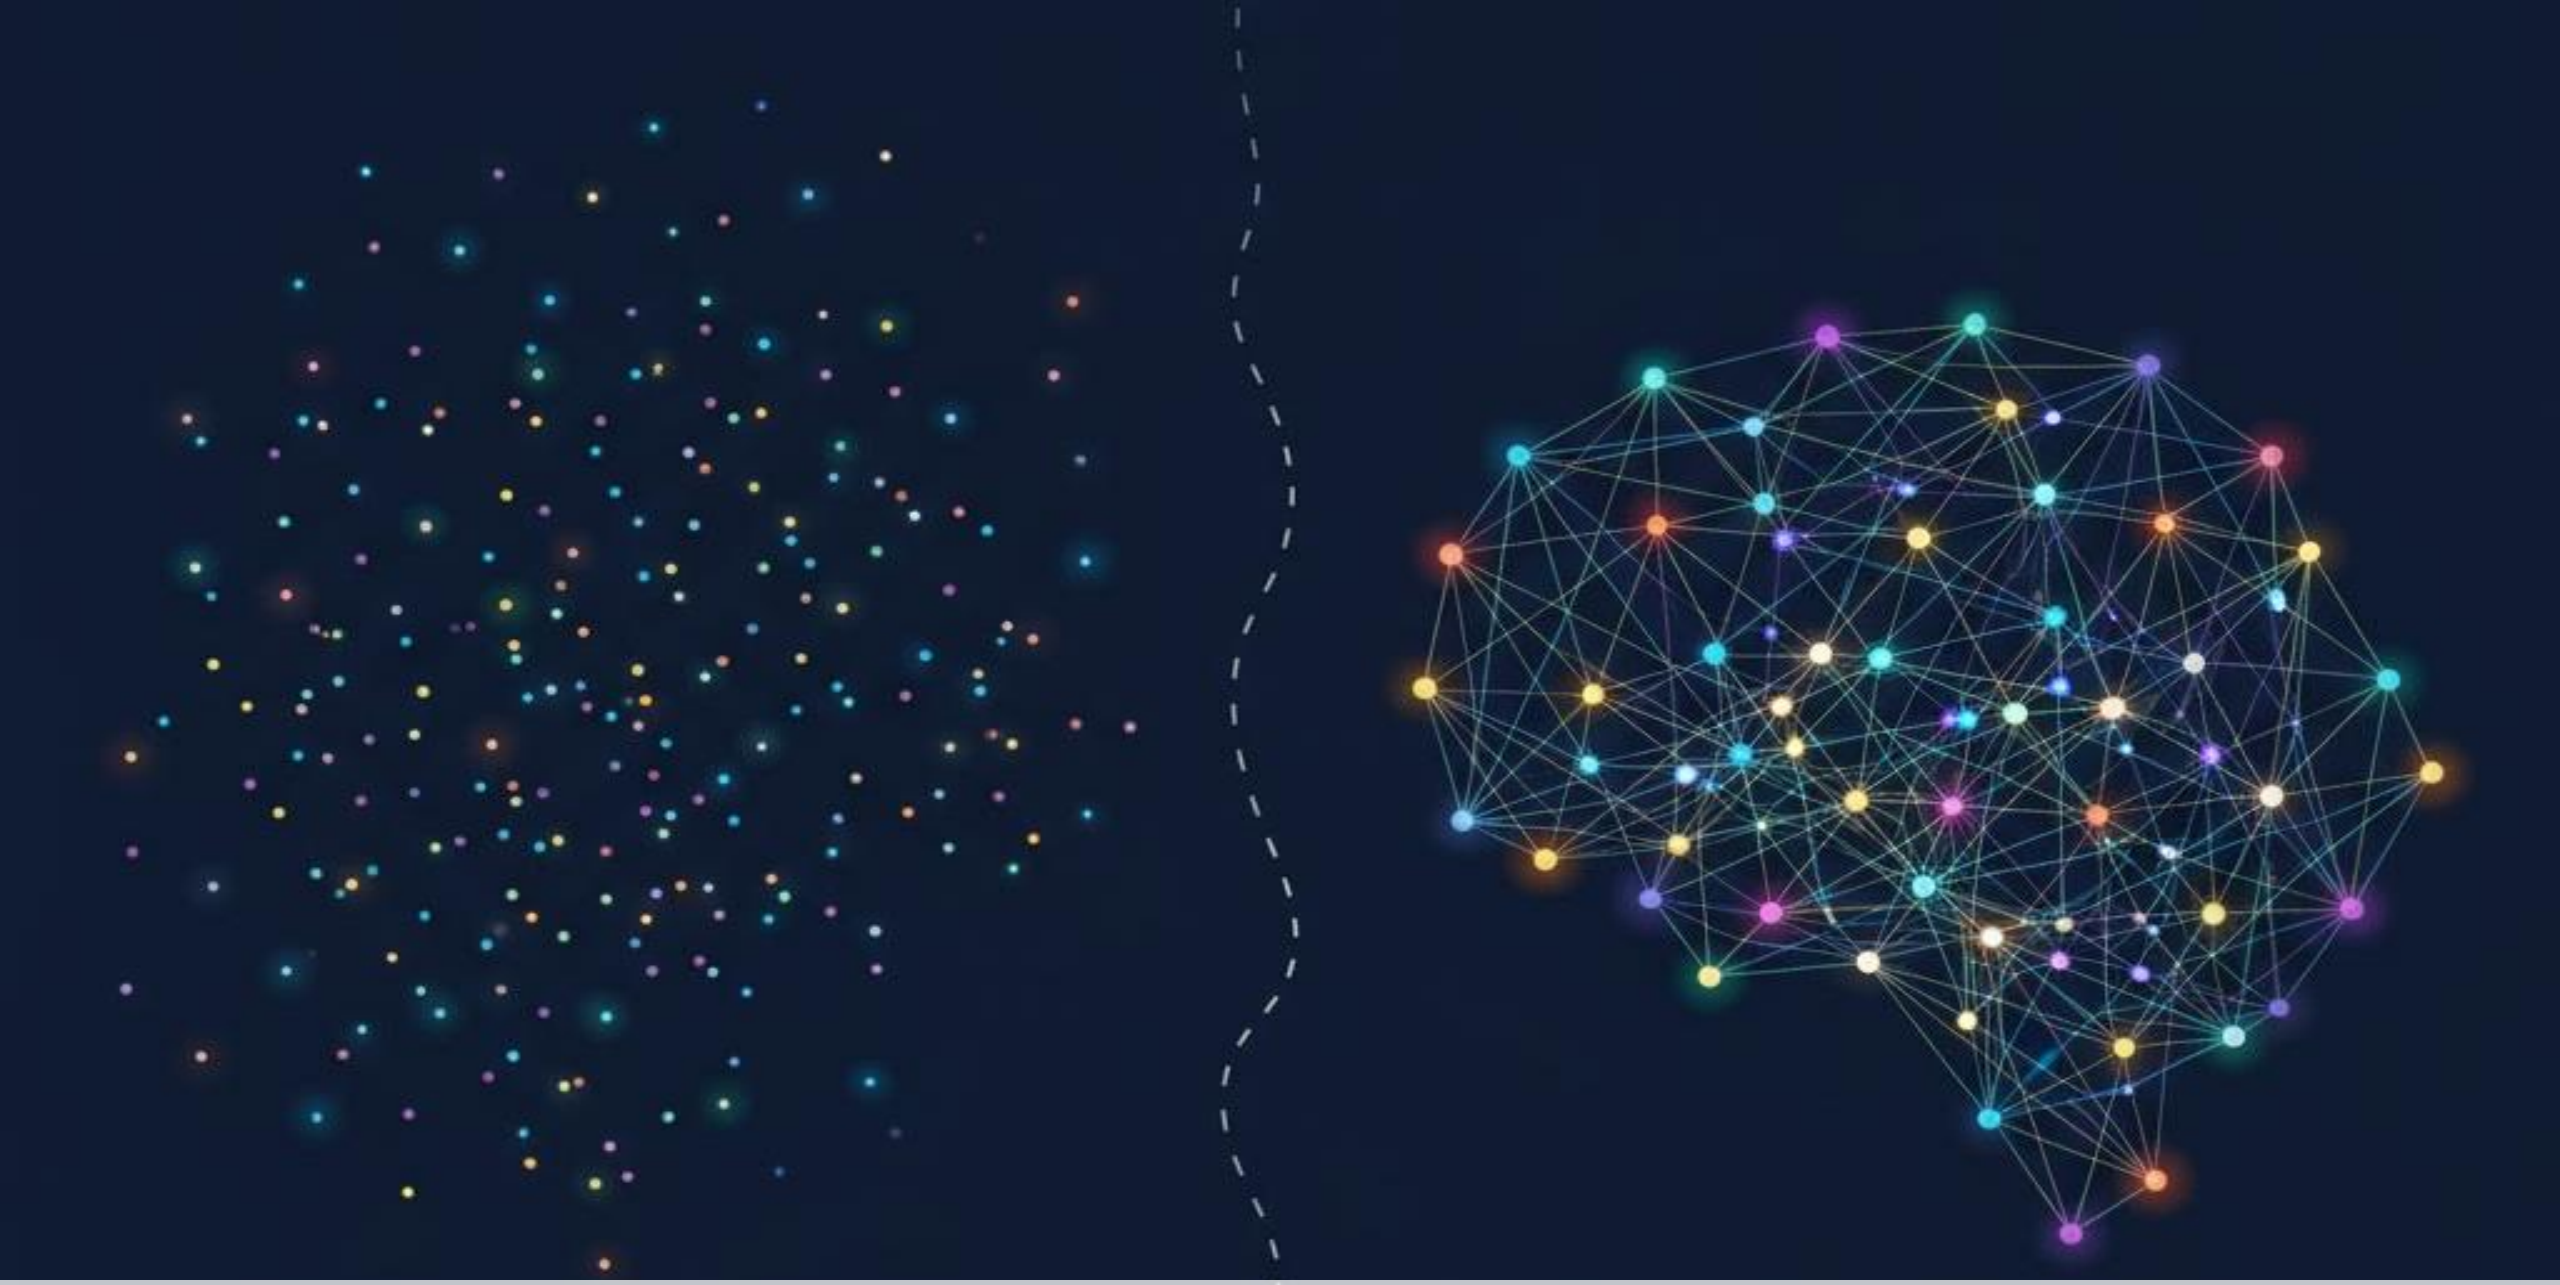
Your Curiosity is a Superpower. Look Inside the Box.

Collect Lenses, Not Just Skills.

Syntax Error.

Use Rejection as Fuel.

Learn to Adapt.



Connect Your Dots.

Leadership is About Being a Coach. In the AI era too.

Stay curious. Keep taking things apart. Ask 'why' until it drives everyone crazy. And never, ever let anyone make you feel small for not having a perfect plan.

THANK YOU
