

Revolutionizing church recruitment with the #1 faith-aligned job board connecting 22k individuals

“*The most important feature was being able to set up a custom questionnaire. And Niceboard was the only platform that had a way to manage that without a lot of extra coding or custom work*”

Challenge

Renew's church leaders lacked a reliable platform for their community of over 22k individuals and 300 churches to find ministry jobs and talent that align with their mission.

All existing church job boards were outdated, with obsolete job postings and inactive profiles.

Solution

With Niceboard, Renew found a **fast, customizable solution without paying a developer**.

The user-friendly interface and support successfully filled the gap in their community.

Results

Today, the Renew job board is an **important resource for church leaders**, offering up-to-date job listings. The revenue generated from job postings supports Renew's mission and helps drive more aligned people to their community.

- **attracting members** for the association
- facilitated **alignment** between employers and potential hires
- non-technical **setup to launch in only one week**

“

Niceboard is really a hands-off way for us to provide a job board that stays relevant and fresh.”
