*\*\*\*Goodrick Contracting/Duyvestyn Drainage Ltd is the only Council-approved contractor for the Tarawera Sewerage Scheme Stage 2 (on-property LPGP installation and connection to the street mains).*

## **CONTRACTOR'S APPROVED SERVICE LEVELS FOR CONNECTION TO ROTORUA LAKES COUNCIL WATER/WASTEWATER AND STORMWATER INFRASTRUCTURE**

The logo for Rotorua Lakes Council, featuring the words "ROTORUA" and "LAKES COUNCIL" in white, bold, uppercase letters on a black rectangular background.

### **WATER**

Work carried out by Water Approved Contractors is split into two levels of connection as described below. Work carried out on mains 200mm diameter or larger can only be undertaken by W2 Level Approved Contractors. Approved Contractors can be registered for one or more of these construction levels and must not under any circumstances carry out any works beyond the Level for which they are approved.

#### **Level One (W1)**

*Installation of service connections under pressure*

Covers the installation of service connections where no shutdown is required. The connection is to be carried out by live tapping of the main with up to a 32mm diameter connection, and with special equipment up to a 60mm diameter connection.

#### **Level Two (W2)**

*Installation of connections requiring a shutdown*

Provides for the connection of new mains to existing reticulation where a shutdown is required.

### **WASTEWATER (WW)**

For all types of gravity connections

### **STORMWATER (SW)**

For all types of connections.

### **LOW PRESSURE SEWER (LPGP)**

For work on private property, including the installation of pressure sewer systems. Work on LPGP systems needs to be done to the relevant specifications and documentation (available from RLC).

Goodrick Contracting/Duyvestyn Drainage Ltd is the only Council-approved contractor for the Tarawera Sewerage Scheme Stage 2 (on-property LPGP installation and connection to the street mains).

(Note, connecting gravity sewer into an existing pump chamber comes under **(WW)**)
