

## VISITORS

Remigio Baca (circa 2002)

The Magdalena Mountains  
to the place of San Anton.  
There's things flying through the air  
we don't even know.  
Some say visitors from space have come  
to contact you and me  
I say, we're better off  
if you're their contactee.

One early summer afternoon  
as we were going by,  
we saw this flying disk  
that fell out of the sky.  
It wobbled up and down,  
dropped pieces of trash.  
We thought it was inevitable  
that it was going to crash.

It crashed into the gully.  
a short ways from the county seat.  
These were the strangest creatures  
we would ever meet.  
The military came and told us  
we had to forget real soon  
that we had just witnessed the crash  
of a weather air balloon.

(continued)

I've taken wooden nickels and bought  
a lot of bridges too.

There were pieces of material,  
and I'm a'telling you,  
You'd roll it up and it jumped  
into its original form.

We took a little of this and that  
and ran all the way home.

Well, we've taken wooden nickels,  
bought a lot of bridges too.

I'm here to tell you, Mr. Military,  
we're incensed with you.

about the material from the site  
to you we don't want to talk.

At 10:00 AM on Saturday morning  
it goes on the auction block.

There's foreign dignitaries  
and companies that will bid.

We've arranged for you to tell them  
all you know and did.

And said it's more unusual  
than materials from the moon.

After all, this is just trash  
from an old weather air balloon

After all this is just trash  
from an old weather air balloon.
